

# CHEMICAL CLEANING / CHEMICAL CIRCULATION

## THE EMORY DIFFERENCE

If you are experiencing a lack of efficiency in your process equipment, a build-up of contaminants could be the problem. The Emory team can take a sample of the problem contaminant and work with our in-house lab to create a specific cleaning package to break down the contaminant and get your equipment running smoothly again.

### INDUSTRY USES

- ▶ Natural Gas Plants
- ▶ Field Booster Compressor Stations
- ▶ CO<sub>2</sub> Plants
- ▶ Refineries
- ▶ Renewables Facilities
- ▶ Power Generation Facilities
- ▶ Tank Batteries
- ▶ Anywhere there are process equipment vessels.

### EQUIPMENT TYPICALLY CLEANED

- Amine Systems
- Cooler Systems
- Dehy Systems
- Engine Blocks
- Oil Coolers
- Plate and Frame Heat Exchangers
- Re-boilers
- Scrubbers
- Separators on the skids
- Tube and Shell Heat Exchangers (Tube and Shell side)
- Vessels (Heater Treaters etc.)
