

ARE YOU **SICK AND TIRED** OF...

**INEFFICIENT OR
INOPERABLE EQUIPMENT?**

**MESSY CLEANUP AFTER
PRESSURE WASHING?**

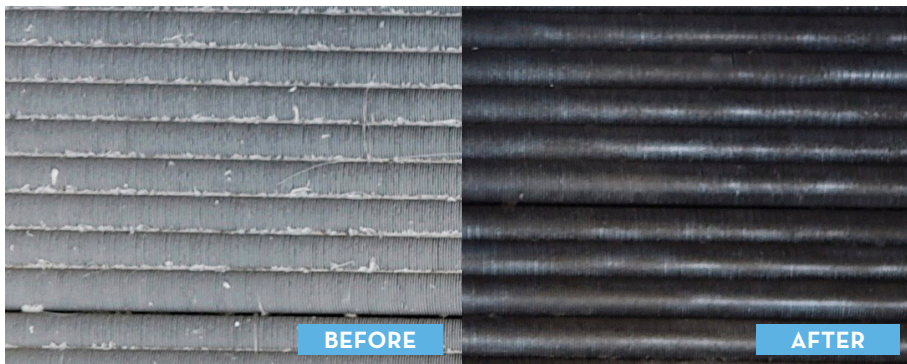

**WASTING MONEY ON
HIGH ENERGY COSTS?**

EMORY'S eco-friendly dry ice cleaning will enable **you** to:

- **REDUCE DOWNTIME** - Avoid failure of your heat exchangers / fin fan coolers by cleaning them on a regular maintenance schedule.
- **ELIMINATE UNSAFE / MESSY CLEANUP OF WATER** - Since the dry ice turns to gas upon impact, there is no secondary runoff to clean up and decontaminate.
- **CUT ENERGY COSTS** - You'll save hundreds of thousands of dollars by cleaning dirty assets and cooling equipment.

BENEFITS OF DRY ICE CLEANING

CLEAN

- Non-abrasive
- Removes the toughest contaminant from a variety of surface areas
- Non-conductive, non-corrosive, non-flammable
- Cleans in tight spaces with precision

LEAN

- Cleans online, in place while hot
- Improves longevity of equipment
- No disassembly required
- Minimizes labor resources and costs

GREEN

- FDA, EPA, USDA approved
- No toxic chemicals
- No water or moisture
- No secondary waste stream
- Made from recycled CO2

OTHER BENEFITS INCLUDE:

- **Prepare surfaces** for NDT/NDE testing/inspections.
- **Minimize unnecessary metal loss** caused by more abrasive cleaning media (such as sand and water).
- **Save money** with lower energy costs. On average, a 10% increase in air flow uses 33% less motor power. This increase significantly impacts energy consumption, unit efficiency, and maintenance costs.
- **Most innovative** cleaning application available.
